

Avenir

Your CREST registrar provider
for the 21st century

An introduction

Founded in 2014, Avenir is a truly next-generation CREST registrar. Our platform has been built using the latest technologies, allowing us to optimise processes and maximise automation at every step. This streamlined approach ensures that Avenir clients receive the highest quality of service, clear and transparent pricing, along with excellent value for money.

Our focus on technology ensures that our services are highly reliable and can also scale rapidly to meet the changing demands of issuers. Furthermore, with the backing of an experienced management team, Avenir can deliver the necessary support to onboard clients quickly and with minimum disruption.

"Avenir has previously facilitated a primary London listing in just five working days."

The company has already provided both CREST and non-CREST registrar services to more than 200 unique issuances.

Avenir services overview

Our registry services are available regardless of whether the security is to be quoted on a stock exchange or remain unlisted. Our services include acting as a Receiving Agent to enable capital raising activities, voting events, dividend and coupon distributions. Appointing the right registrar is increasingly important as regulatory changes increase the obligations on the issuers. Any service provided by the registrar is also key in maintaining good stakeholder engagement. Avenir's flexible, collaborative approach ensures that issuers always receive an outstanding level of support not only at the outset, but also on an ongoing basis throughout the relationship.

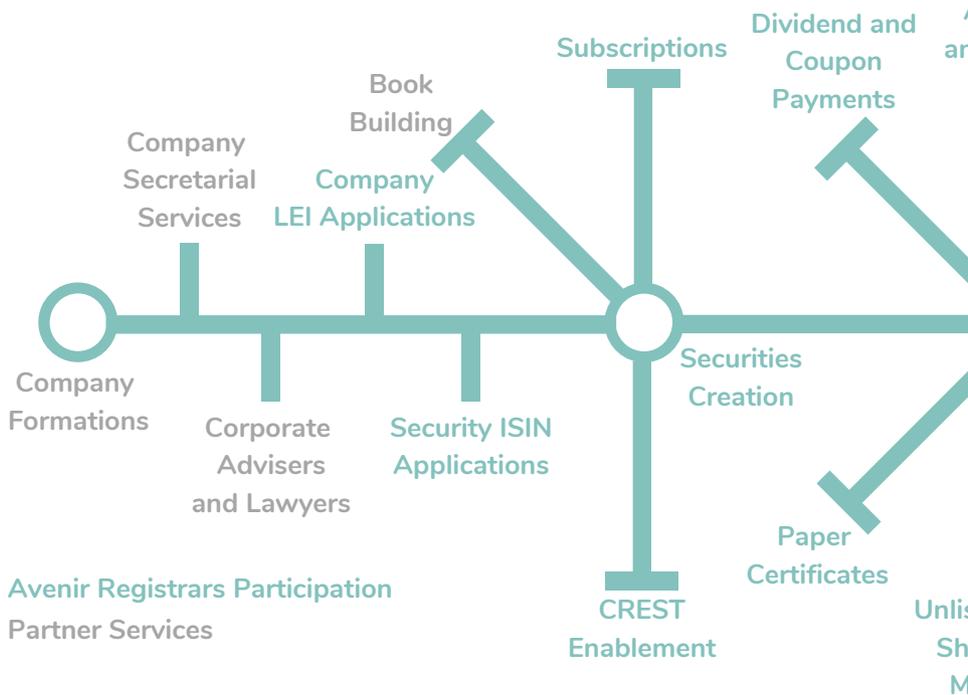

Avenir's Technology

As the newest CREST-enabled registrar, users of Avenir's technology benefit from having access to the most innovative and modern registry software available in the UK. Built using the latest development tools, it provides the most agile and user-friendly system on the market today. Issuers and their holders alike, can both view the detailed information they need, on demand and all delivered via an attractive, intuitive interface. Access to the system is via a standard web browser and the responsive nature of the platform means that this can be via a laptop, tablet or smartphone - wherever you are. This easy access to data is not, however, provided at the cost of data security. The system is built to meet the highest industry standards of data security, including two-factor authentication to enable access. Issuers can obtain a real-time view of the register of members for all their issued securities, showing all statutory information and holding percentages, with the ability to sort using a variety of criteria or by searching for specific holders and information. Avenir is at the forefront of driving registrar services into the 21st century.

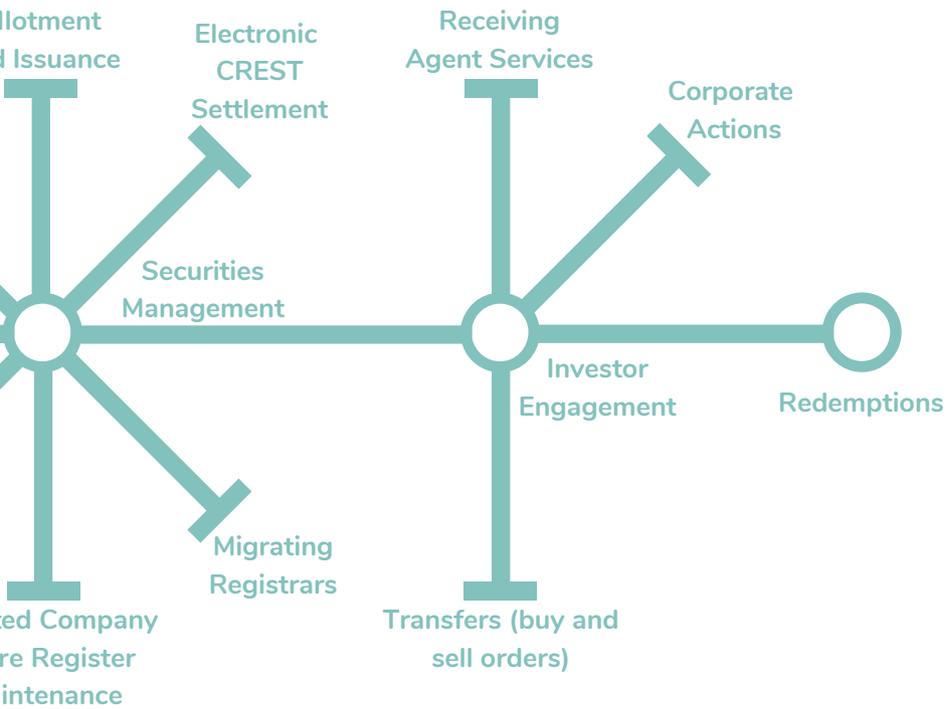

Our services include:

- Equity listings
- Bond issuance
- Register keeping
- Receiving Agent duties

Avenir REGISTRARS

A roadmap for securities issuance

The Avenir Way

Avenir Registrars clients include privately and publicly held businesses who have issued debt, equity and other structured products. Collectively, their instruments are listed at venues including NEX, the International Stock Exchange, the Gibraltar Stock Exchange, Nasdaq OMX and the London Stock Exchange. The Avenir Way is all about providing straightforward guidance to help clients understand what needs to be done. Avenir's consultants comprehend the situation, reduce the burden, and in turn accelerate the entire delivery of achieving the CREST registration. Working as a facilitator to help corporate advisers, lawyers, company secretaries and directors play their individual roles in the registry process, this project management approach not only delivers quicker results, but can also help significantly reduce the fee burden for issuers.

Built on the shoulders of giants

The technology behind Avenir Registrars has been built from the ground up by an expert team of developers based in the UK and New Zealand, working for Avenir Technology Limited. As a developer of securities depository, registry and other post-trade settlement systems for equity, commodity and derivatives exchanges across the globe, Avenir Technology has an in-depth understanding of market infrastructures, including Centralised Securities Depositories and Central Counterparty Clearing systems. In addition to the work undertaken for Avenir Registrars, Avenir Technology has also played a pivotal role in the enabling of new exchange ventures in countries including Malawi, Kazakhstan, Vietnam, Lebanon and Tajikistan.

The senior team

When clients need support, they can rest assured our highly skilled team is on hand to share their extensive industry knowledge and experience. We differentiate ourselves through our understanding of market infrastructure and a friendly approach, enshrined in an ethos that ensures we deliver above expectations. The entire team has decades of combined market and clearing experience to draw on.

Hardeep Tamana, co-founder and Managing Director of Avenir Registrars. 25 years' experience in banking, stockbroking and capital markets.

Simon Griffin, Business Development Manager. Broad financial experience encompassing stockbroking, derivatives, banking, research, financial journalism & security handling.

Samiul Siddique, Head of Capital Markets at Avenir Registrars. Two decades worth of financial markets experience with a number of the UK's leading wealth managers and stock brokers.

Erick Grillon, Business Executive at Avenir Registrars. More than 20 years of experience across a range of global investment banking and stockbroking roles.
